Trilogy Networks Provides Network Infrastructure Solution to Revitalize A Community

North Sioux City, SD – June 7, 2002 – Trilogy Networks, Inc., a leading provider of network infrastructure solutions across the United States, today announced its latest network deployment contract. Working together with the [Enterprise Foundation](#) and [One Economy](#), Trilogy designed and will install a showcase computer lab at the Paul L. Dunbar public school in Atlanta, GA. This lab features 31 Gateway desktop systems and a 50 inch plasma screen as the focus for classroom presentations. Trilogy Networks has a long history of bridging the digital divide by taking technology to underserved areas; this undertaking is a continuation of that work.
