Business Benefits

- ▶ Trilogy manages the process for gaining connectivity allowing your staff to focus on their business responsibilities
- ▶ Lower broadband costs
- ▶ Provide connectivity to all locations - enabling more robust communication with your sites
- ▶ Quicker access to sales, financial, and other corporate data

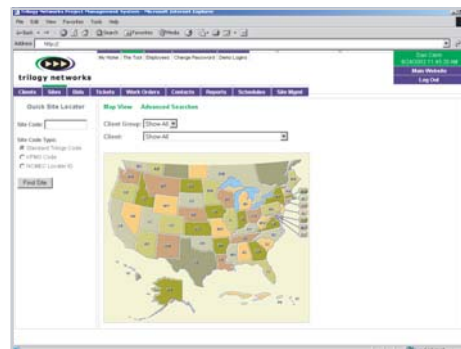

Connectivity Management

At Trilogy Networks, we can help you choose the appropriate connectivity solution based upon your needs for bandwidth, service levels, and expense. If your business involves multiple sites, we can establish site-to-site communications using a solution that best fits your needs and budget.

Experience

Years of experience designing buildings for technology solutions

Installed 900+ locations across the country, all managed through our **getconnected.com** project management tool

Trilogy project manages the connectivity of over 900 locations across the country

Our certified and trained staff deliver consistent results

We utilize top quality materials and providers to ensure reliability and flexibility

Results

You receive a top quality design and installation

You receive clean, organized and documented cabling solutions

All your sites' data cabling worries are managed and resolved by us

You can rest assured that we will deliver consistent results

We do what we say we will do - on time and within budget

We want your business

[the engineers] have been professional, knowledgeable and extremely helpful. We are thoroughly pleased and satisfied with Trilogy Networks. Five Stars!
