Business Benefits

- ▶ Automate your business allowing you to do more business with less resources
- ▶ Deliver detailed documentation to ensure support after installation
- ▶ Trilogy solves business challenges utilizing Web solutions
- ▶ Trilogy is your trusted guide to make effective technology decisions
- ▶ Our systems provide secure, scalable, and intuitive access to your mission-critical data

Web Development

Trilogy Networks specializes in building Web-based software applications for business. Whether you require global access through the Internet, or more limited access through a company intranet, Trilogy systems are secure, scalable, and intuitive.

Experience

We seek to understand your business processes to create effective solutions

We have created several systems to help businesses run more efficiently

We created a Web-based Project Management System - **geteconnected.com**

- ▶ Ties projects to strategic goals
- ▶ Provides dashboard for high level visibility into project status
- ▶ Provides list of all projects in process at your company

Created web-based Venture Capital Portfolio Management System - VC connected

- ▶ Ties investments to strategic goals of the fund
- ▶ Provides high level visibility into project status
- ▶ Provides list of all investments in process at your company
- ▶ Quickly enables complete understanding of investment performance

T1	150
Wireless	13
Other	133

You'll have an efficient process to create orders online

We do what we say we will do

We want your business

We chose a software solution from Trilogy Networks because Trilogy understands our business. They did an incredible job outlining our user requirements and in many cases anticipating requirements we hadn't even thought of. Trilogy Networks Portfolio Management software provides us with easy access to the information we need to run our business. It drives efficiency throughout the company.

Thank you!"

Steve Linden
